EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Grossman on 10 May 2004.

The application has been amended as follows:

In claim 18, at line 3, change "to fast" to read --too fast--.

Amend claim 25 to read:

25. (Amended) An apparatus for visual copyright protection comprising:

- Al
- (a) a light source capable of producing light;
 - (b) a light array, having at least one element, capable of acting on the light to produce a modulated light beam;
 - (c) a light array controller for modulating said light array using at least one disruptive light pattern; and
 - (d) a disruption processor for producing said at least one disruptive light pattern based upon a criterion, said criterion being how said pattern is perceived by an IRD and a human differently.

2. The following is an examiner's statement of reasons for allowance: None of the prior art teaches or suggests the claimed invention. Specifically, while Chaum and Wroblewski each teaches systems that project visual copyright protection information together with a projected

visual image, neither suggests that such a visual copyright protection system can include selecting or producing a disruptive light pattern based on a criterion, the criterion being how the pattern is perceived differently by an IRD and a human, and then controlling the modulation of a light beam by controlling a light array using the pattern, as required by the claims. While Levy et al. appears to teach a number of the features of at least some of the claim of the instant application (see paragraphs [0080]-[0082] and [0085], for example), the effective date of Levy et al. is not earlier than 21 December 2000. Since all of the claims that might be met by Levy et al. are fully supported by the provisional application filed 24 April 2000, Levy et al. does not qualify as prior art for these claims. Similarly, while Tehranchi et al. appears to meet the limitations of a number of the claims (see Figures 22 and 23, as well as paragraphs [0198]-[0213], for example), these claims are supported by the earlier filed provisional application, so that Tehranchi et al. fails to qualify as prior art for these claims. Therefore, none of the prior art teaches or suggests the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1-46 are allowed.

4. This application does not include a duly executed power of attorney and has joint inventors listed. Applicants are reminded that any response to this (or any other) action must either be signed by each named inventor, or be accompanied by an appropriate power of attorney to the person signing the response.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Allebach et al. and Javidi et al. teach apparatus that include light sources, light arrays, light array controllers and disruption processors. The cited non-patent literature references describe the problem addressed by applicant's invention. Hannigan et al. provides visual copyright protection by treating a screen to modify its reflectivity in order to convey information. Revelli, Jr. et al., Bruekers et al., and Eveleens et al. each teach systems that are related to applicant's invention, but each of these references has an effective filing date that is *after* the filing date of the instant application.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Johns whose telephone number is (703) 305-4788. The examiner is normally available Monday through Friday, at least during the hours of 9:00 am to 3:00 pm Eastern Time. The examiner may also be contacted by e-mail using the address: andrew.johns@uspto.gov. (Applicant is reminded of the Office policy regarding e-mail communications. See M.P.E.P. § 502.03)

If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Leo Boudreau, can be reached on (703) 305-4706. The fax phone number for this art unit is (703) 872-9306. In order to ensure prompt delivery to the examiner, all unofficial communications should be clearly labeled as "Draft" or "Unofficial."
